SAFETY SYSTEMS

- 3.5"(9cm) Colour LCD monitor

3.5" Colour LCD monitor with miniature camera

The unit comes with a discreet 15mm diameter weather proof 150 degree view miniature camera which can be mounted on the rear of your vehicle. The unit has the ability to add a second camera to the rear of a van or trailer.

Rear-View Replacement Mirror with 4.5" In-Built TFT-LCD Monitor & Miniature Camera

- Built-in 4.5" LCD screen for rear view camera.

The camera system features a bright, wide view, colour LCD screen providing a crystal clear picture. It is fully waterproof and designed to cope with vehicle vibration and the harshest outback conditions. It offers exceptional performance in both daylight and at night.

FEATURES

- Screen switches on automatically when camera or navigation activated.
- Excellent picture quality even in strong sunlight to make driving safer.
- Anti-glare mirror for day and night time use.
- Easy installation with removal and replacement of old mirror.
- Excellent quality and looks like factory fit.
- Weather proof 150° view.
- Camera mounted on rear of vehicle.
- Optional second camera for rear of caravan or trailer.
- CCD imaging.
- 0.5 Lux.
- Night vision.
- Optional 5" LCD monitor available.

BENEFITS

- Significantly improves driver's visibility, helping to prevent injury or damage to your car.
- Reduces dangerous blind spots.
- Allows for greater confidence when reversing, especially when coupled with reversing proximity sensors.
