

Superior Scratch and Dent Repairs!

Paintless Dent Removal is a process that we use to work the metal back to its new condition, without upsetting the original factory finish of the vehicle.

This is all done by working from behind the panel. A much quicker and less expensive method than traditional repair techniques.

Enviro Scratch and Paint is a fully mobile auto paint and dent repair service. Specialising in repairing all minor paint damage, chips, scratches and small dents, we can also repair bumpers with cracks, tears or holes before repainting them, so your pride and joy will be good as new in no time at all!

Repairs can be performed at your home or work or at our dealership - whichever is more convenient for you!

Just some of the repairs we specialise in, include:

- Paintless dent repairs
- Bumper repairs
- Minor scratches and dents
- Deep scratches and Stone chips
- Side mirrors and Alloy wheels

With our repair techniques carefully performed by our qualified team, all scratches, scrapes, scuffs, chips and dents can be repaired to perfection, returning your vehicle back to its original condition and maximising its resale value and appearance!
